Dear FCC,

There is no reason that I, as a consumer, need the NAB to tell me what to listen to and when. Do not let this group take away XM radios right to broadcast local traffic and weather channels. I can not believe people and corporations these days. Let the consumer choose what they want to listen to and get off our backs.

XM radio provides a variety of quality that is very hard to find these days. I pay monthly for these services because I'm sick of having the FCC and the NAB dictating what I can and can't hear. I am very capable of turning the channel is content is not to my liking. Please reject NAB's petition 04-160 and support XM's ability to provide the kind of programming that we demand and deserve.

Thank you.
